Construction Update

Irwin Creek Tributary to Remount Road

Wastewater Improvement Project

AUGUST 2022

THE PIPELINE

A NEWSLETTER ABOUT THE IRWIN CREEK TRIBUTARY TO
REMOUNT ROAD WASTEWATER IMPROVEMENT PROJECT

Construction Activities to Expect

- **Clearing** – Crews will clear trees, bushes and shrubs along the easements following the alignment.
 - **Moving equipment on site** – Crews will move construction equipment and materials to easements along the project site throughout construction.
 - **Pipe delivery and storage** – Pipe is delivered and stored within the construction easements.
 - **Establishing a safe work zone** – Fencing will be installed around work areas and pipe will be stabilized.
 - **Construction traffic** – Dump trucks will travel along the alignment, within the easements and roadway.
 - **Trench digging, placing pipe and backfilling**
 - **Rock Blasting** – Crews may remove underground rock formations by use of small, controlled blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing and property owners within 500 feet radius of the blasting will be contacted further for pre-blast surveying. Blasting is a standard construction procedure in which holes are drilled into the rock for dynamite placement and covered with heavy mats.
- All safety precautions will be taken. Customers may hear a warning horn, a muffled noise, and slight vibration or rumble similar to a slammed door or thunder.
- **Road closures and detours around work** – Dunavant Street and Remus Road and Brookhill Road are expected to have lane closures in place from mid-August through mid-October. Motorists should follow all traffic control signs. See detour maps for more information.
 - **Southside Park Closure** – The Southside Park is expected to be closed through June 2023. Crews are installing a stormwater culvert from Southside Park to the other side of Toomey Avenue.
 - **Temporary Water Outages** – Crews are checking and replacing water valves along the project area, which requires temporary water service interruptions. If your service is impacted, you will be communicated to directly.
